

9 PANEL RIGID MOSAIC SYSTEM

Allows for large X-ray images to be taken with a single trip downrange

The WMDTech Mosaic System is a versatile 9-panel system allowing for large X-rays with a single trip downrange. The system utilizes a rail and suction cup system allowing the user to quickly dispatch the Mosaic System right out of the Pelican Case. High quality anodized railing system allows for a rigid, sturdy and self aligning platform reliable during most situations.

Contact the WMDTech Sales department for sizing information.
