

SUPRACONIC

BY TETAC

Conical shape charge system for UXO disposal, explosive access and precision aim operations

The Supraconic is a highly versatile, compact, conical shape charge system utilized by EOD and Special Forces personnel for UXO disposal, explosive access and precision aim operations. The Supraconic is provided to the end user in an inert state and may be hand packed with C4 or similar type bult explosives (15.5 grams). A blasting cap locking mechanism ensures that the blasting cap is secured into position prior to placement. A front mounted site enables the tool to integrate to a precision aim grid board for precision targeting. Tool consists of 24mm projectile

FEATURES

- + Load up to 15.5 grams of C-4
- + Up to 15,000 FPS
- + Can easily penetrate an inch of steel
- + Compact Aiming Tripod (optional)
