

PAN ADAPTER

BY TiTAN

Adapter allowing for the TiTAN Disruptor to be utilized with the XTK Grid Aim System

The TiTAN Adapter clamps to the base of the TiTAN Disruptor, just above the breach. The Adapter mates perfectly with the XTK Grid Aim System Weapons Block, which allows the Disruptor to precisely aim and fire using the XTK firing solution. When fired, the TiTAN Adapter allows the disruptor to eject properly from the Weapons Block with minimal movement of the precision platform, ensuring an accurate shot.

The Adapters come in two options - reusable and replaceable Plastic, or a sturdy and permanent black anodized aluminum stock.

FEATURES

Plastic or Aluminum
